# Quality Products Powerful Solutions

Products for Caterpillar® Engines

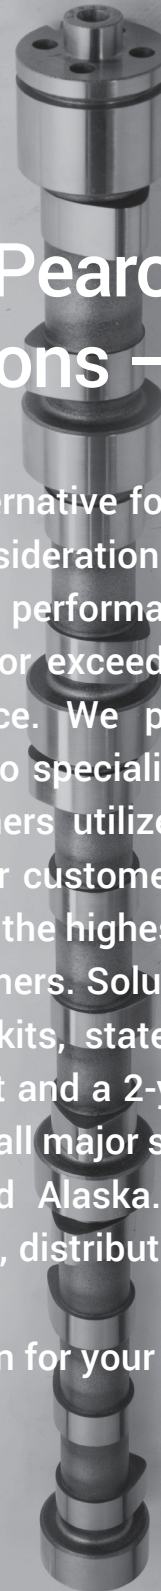

## What is Pearce Power Solutions – PPS?

PPS is a high-quality alternative for your Caterpillar® needs. Quality is the prime consideration with PPS... evidenced by over 20-years of proven performance and positive results. PPS products will meet or exceed OEM quality in fit, form, function, and appearance. We partner with experienced, expert manufacturers who specialize in OEM best practices. Our manufacturing partners utilize innovative technologies conducive to meeting our customer's regulatory and market requirements. Along with the highest standards of quality, we offer solutions for customers. Solutions include cutting edge design, custom service kits, state of the art packaging, a Tier 1 service department and a 2-year warranty. Our service centers are positioned in all major shale plays in the USA plus locations in Canada and Alaska. PPS is backed by 100 years of success in sales, distribution, and technical service.

PPS is the Solution for your Caterpillar® needs!

# 3500 Series Kit

8, 12, 16, and 20 Cylinder Engines

3500 overhaul components are made to OE specifications by OE manufacturers. Solutions to meet the needs of our customers are of the highest priority. State of the art packaging is one example of a PPS provided solution. Each kit is packaged in a custom container sized for optimum usage. CNC formed layers of foam are utilized to safely secure each component for transport and staging. Components are packaged in a logical order, top to bottom, designed to efficiently flow with typical overhaul work scopes. Containers are clearly marked with corresponding part numbers and are palletized for safe handling.

# 3300 & 3400 Series Kits

3300 – 4 and 6 Cylinder Engines • 3400 – 6, 8, and 12 Cylinder Engines

Tough and durable is how 3300 and 3400 series CAT® engines are described. PPS products are designed and manufactured to parallel the same toughness and durability. Our 20+ years of success with 3300 and 3400 overhaul components is well documented. State of the art packaging and logical organization is standard with all PPS repair and overhaul kits. Camshafts, oil coolers, water pump assemblies and typical overhaul components ... PPS has YOU covered.

# Custom Kits & Parts

3300, 3400, and 3500 Series

Custom overhaul kits are designed to offer convenience and efficiencies to already established purchasing, inventory, and repair processes. PPS maintains a variety of custom overhaul kits, as well as custom repair kits, based on typical work scopes. We offer the flexibility to create custom kits based on our customer's preferred work scopes. You provide a parts list and together we create a single, unique part numbered custom kit for use in any repair or overhaul project. Gasket kits, water pump repair or replacement, top-end projects and complete overhauls are just a few examples of customized kits which can be available. Imagination establishes the limit. Customized gasket and repair kits can become subsets of major overhaul kits. Our packaging techniques allow for sub-kits to be immediately accessible upon opening a customized overhaul kit container. They can then be easily distributed to corresponding repair cells or subcontractors.

Subset, gasket kit, front structure

# Full Service & Rebuilds

3300, 3400, and 3500 Series

PPS offers custom overhauls performed by our team of Tier 1 service technicians. Expect service of the highest quality, whether performed in the field or in one of our strategically located service centers. When time is of the essence, let PPS offer a solution by providing access to our vast inventory of exchange engines. We can provide all engine models within the 3300, 3400 and 3500 natural gas series. Overhauls performed in our Houston Reman Center, as well as in our Spruce Grove Service Center, are test run on in-house dynamometers. Results of all dyno tests are recorded, and corresponding reports are provided to our customers.
